PROFILE SUMMARY

An industrious, quick-witted and enterprising chemist with professional experience in qualitative and quantitative analysis of chemical substances, to gain and accentuate the benefits and risks associated with organic and inorganic compounds. I'm a Critical thinker who is reliable, responsible, organized and proficient in handling modern statistical packages. I also have quality hands on experience across analytic test management, information verification, process improvement, client relations management, and team collaboration, to mention a few. Enthusiastically adept in handling other tasks outside the scope of my experience with an aim to develop across all areas.

PROFESSIONAL OBJECTIVES:

To cooperate with fellow team members, create friendly work environments that offer opportunities for results, process improvement, service delivery and career progression.
